Jokes of the month

Guy walks into an auto parts store and says to the counterman "I'd like new air freshener for my Holden." The guy behind the counter shakes his hand and says "OK, that sounds like a pretty decent trade."

Q: What's worse than raining cats and dogs? A: Hailing taxis!

Q: What's the difference between a Ferrari and six trash bags full of recyclable cans? A: I don't have a Ferrari in my garage.

Q: What did Batman say to Robin before they got in the car? A: "Robin, get in the car."

Members enjoying a great meal and chat.

The Editors Notice Board.

The Annual September trip has been organised and there is an itinerary and costing out, if anyone is still interested in going or you are going and have not received it yet contact one of the committee members as it has to be paid in full by the 20th of July.

The newsletter costs are getting higher as is everything else, so if you would like to change to E-Mail to cut our cost (more for free BBQ's) and my work, could you let me know please.

There are advantages to getting it E-Mail as it will be in colour and you will also get it earlier (if I don't forget to send it)

If you would like to get the car club reminder text messages (which are very handy) could you text your name to 0493 985 281 and Adam (Club Captain) will put you on the list.

Lake Boga Park and Bragg.

Automotive History Facts

Windshield Wipers Were Invented By A Woman Named Mary Anderson

In 1905, Mary Anderson invented **windshield wipers** to remove the hassle of driving in the rain or snow. Before windshield wipers were invented, drivers would have to repeatedly get out of their cars and clean off the windshield by hand.

Antilock Brakes Were Invented Over 50 Years Ago

The first antilock brakes were invented in the 1920s, and they became more popular in the 1990s. Today, most modern cars have an antilock braking system, or ABS.

The Term "Tune-Up" Was Created By Henry Ford While Working On His First Automobile Prototype

Henry Ford spent a lot of time working on the automobile, and he noticed that when the coils worked together properly, they would buzz. If the coils didn't make the buzzing sound, it showed they needed an adjustment that he later called a "tune-up."

The First Electric Vehicle Was Created In 1832

Robert Anderson created the first electric-powered vehicle in 1832. Then in the 1990s, General Motors produced the EV1, otherwise known as the first mass-produced electric car.
